

## FLEXIBLE

Providing convenient scalability, SIPStation allows channels to easily be added or removed as necessary. Number porting is fast and simple, and SIPStation works with any PBX setup, including FreePBX, PBXact, Switchvox and more.

## RELIABLE

With SIPStation, communications need not depend entirely on hardware. With multiple redundancies in the data centre and Internet routing, calls can be rerouted multiple ways in the event of network or PBX failures. Never miss a call!

## FULLY SUPPORTED

Sangoma guarantees fast, professional deployments (even multi-site!) with UK-based onboarding services and worldwide tech support.

## COST-EFFICIENT

With monthly, annual and three-year plans, benefit from predictably affordable monthly payments while saving thousands off your phone bill (often over 50%!) with unlimited calling to UK fixed, UK mobile and USA numbers.

## FUTURE-PROOF

With the ISDN switch-off fast approaching, there's no better time to migrate away with SIPStation. There is no need to replace your PBX right away because SIPStation SIP trunking is a painless stepping stone to enabling Unified Communications and collaboration.

## FIVE REASONS TO CHOOSE

**SIPSTATION**  
POWERED BY **SANGOMA**®

**WHY HOLD ON TO  
SEPARATE NETWORK  
CONNECTIONS?  
SIMPLIFY AND SAVE  
WITH CUTTING-EDGE  
SIP TRUNKING.**

Session Initiation Protocol (SIP) allows for virtual phone line trunks, eliminating unnecessary analogue and ISDN lines.
